SENG 4620 Group Contract

Oct 1, 2026 · @Ahsan

Ahsan Habib Niloy and Kareena Zaman Eula agree to the rules below for the SENG 4620 term project. Each member initials every clause.

Attendance and punctuality

#	Clause	AN	KE
1	Each member shows up on time to class and to our in-person meetings every Tuesday and Thursday, 1:30 to 3:30 PM.		
2	A member who is less than 5 minutes late joins quietly without disrupting the meeting. Filling them in is optional.		
3	A member who is avoidably late buys the other member a coffee.		
4	A member who cannot attend gives at least 2 days' notice by iMessage.		
5	A member who misses a meeting reads the notes and responds within 48 hours.		
6	After 3 unexcused absences, the issue is taken to the instructor.		

Respect and conduct

#	Clause	AN	KE
7	We treat each other with respect. We criticize ideas, not people ("I don't think that will work because…", never "that's stupid").		

#	Clause	AN	KE
8	If a member treats the other disrespectfully, the issue is discussed with the instructor.		
9	No cross-talking: we do not interrupt while the other person is speaking.		
10	If one member is dominating a discussion, the Timekeeper (Kareena) may politely interrupt and invite the other to speak.		
11	Disagreements are talked out openly at our next meeting before going any further.		
12	Each member replies to the team iMessage chat within 4 to 8 hours.		

Responsibilities, academic honesty and AI

#	Clause	AN	KE
13	Each member completes their share of each phase, with all evidence finished at least 1 day before the official due date.		
14	All code lives in our GitHub repository and all evidence and drafts live in our shared Google Drive. No work stays only on a personal laptop.		
15	If a member does not finish an assigned task on time: [to decide]		
16	Each member reads and follows TRU's Academic Integrity rules, available on Moodle.		
17	If a member submits plagiarized material or cheats, the group brings it to the instructor's attention immediately.		

#	Clause	AN	KE
18	We follow the SENG 4620 AI policy: AI is used freely for out-of-scope work and as a tutor, never to generate our infrastructure code, network design, diagrams or handbook writing.		
19	Each member logs their AI use as they go, and both members review anything AI touched before it is submitted.		
20	Credit is given where it is due, and not where it isn't.		

Other rules we want to add: [to decide]
